

OGUNDIPE DANIEL

Full-Stack Software Developer | React, Node.js, TypeScript, AWS
+2349132588749 | ogundipe.daniel@outlook.com

SUMMARY

Full-Stack Software Developer with 5+ years of experience building scalable, user-centric web applications using React, Next.js, Node.js, Express.js, and cloud platforms (AWS, GCP). Experienced in delivering production-ready fintech, blockchain, and edtech solutions with a focus on performance, security, and responsive user experiences. Proven track record of improving system scalability, including supporting 30% more tenants through multi-tenancy architecture, while collaborating with cross-functional teams to ship high-quality products.

EDUCATION

University of Lagos: Bachelor of Science, Mathematics *Oct 2021 - Sept 2026*
Relevant Courses: Calculus, Linear Algebra, Operations Research, Computer Programming.

EXPERIENCE

TRICODE PRO– Frontend Engineer– Remote *Jan 2025 – Present*

- Architected frontend for SUI Lockup App (blockchain asset management platform) using React and TypeScript, establishing scalable component architecture and Redux state management patterns.
- Developed security-focused UI workflows to improve user trust and transaction transparency.
- Integrated AWS Cognito for authentication and GCP Pub/Sub for real-time transaction monitoring, handling 1,000+ daily blockchain events.
- Implemented secure wallet interactions and a real-time asset tracking dashboard using WebSocket connections to AWS-backed infrastructure.

AGERU– Frontend Developer– Remote *Feb 2023 – Jan 2025*

- Shipped a responsive restaurant website using React, Tailwind CSS, and SCSS with mobile-first design, optimizing bundle size and lazy loading to achieve sub-3s load time.
- Improved accessibility by implementing WCAG 2.1 AA standards, including ARIA labels, keyboard navigation, and semantic HTML across all components.
- Built reusable React components consuming RESTful APIs for a real-time product catalog with client-side filtering, sorting, and secure transaction handling.

NITHUB– Frontend Developer– UNILAG *Oct 2021 – Dec 2022*

- Contributed to building dynamic, user-centric web applications by collaborating with UI/UX designers, backend developers, and project managers, fostering a team-oriented approach to deliver scalable solutions.
- Integrated RESTful APIs to fetch and display dynamic data, implementing client-side form validation and input sanitization to prevent XSS and injection attacks.
- Migrated 20+ UI components from vanilla JavaScript to React, improving state management and reducing code duplication by approximately 25% through reusable component architecture.
- Collaborated with a cross-functional team to enhance platform scalability and user experience through iterative feedback and agile development practices.

PROJECTS & SERVICES

HNG TECH– Frontend Developer Intern– Remote

June 2024 – Aug 2024

- Implemented a responsive website in collaboration with a product designer, using Tailwind CSS and SCSS to ensure mobile-first design and layout consistency across all pages.
- Implemented React Router for navigation between pages and created protected routes for authenticated users.
- Built reusable React.js components for dynamic UI sections, consuming RESTful APIs to display real-time product data with client-side filtering and sorting.

UNILAG– Research & Mathematics Education Volunteer– Yaba

June 2026 – Aug 2026

- Facilitated mathematics learning sessions for Junior Secondary School students on algebraic expressions and fractions.
- Administered pre-test and post-test assessments as part of a research study evaluating the impact of gamification on students' achievement and interest in mathematics.
- Guided students through lesson activities while ensuring a supportive and engaging learning environment.

FULLSTACK DEVELOPER

- Designed and built AlgeFox, a gamified mathematics learning platform for Nigerian secondary students, using React and Node.js with MongoDB to deliver interactive lessons on algebra and fractions.
- Collaborated with a product designer to translate learning objectives into an engaging, game-based UI/UX, then implemented the designs into functional, responsive interfaces.
- Built an Express.js backend with MongoDB to power lesson delivery, progress tracking, and gamified reward systems for a mathematics learning platform.

FULLSTACK DEVELOPER

- Built a full-stack movie discovery platform using Next.js (SSR), React, Express.js, and MongoDB, implementing server-side rendering and responsive design for a seamless cross-device experience.
- Integrated the TMDB REST API to fetch and display real-time movie, TV, and anime data, including trailers, cast, genres, and recommendations, while implementing client-side caching and robust error handling for a seamless user experience.
- Designed Supabase database schema with Row-Level Security (RLS) policies across profiles, favorites, watch_history, and ratings tables to enforce user-level data isolation.

SKILLS

Languages/Frameworks: JavaScript, TypeScript, Python, SQL, React, NextJs, ExpressJs, Vue, Node, JSON

Tools: Git & GitHub, Vite, FireBase, MongoDB, NPM, GraphQL, Figma, REST API's.

Technical Skills: Documentation & Technical Writing, Cross-Browser Compatibility, Responsive Web Design, Version Control, Microservices, Test-Driven Development.

Cloud: Data services, Cloud-Native Development, AWS, GCP, Azure.

Development Practices: Test-Driven Development, Agile, Version Control, Code Reviews, Technical Documentation

CERTIFICATIONS

HNG INTERNSHIP: Frontend Developer Intern

UDEMY: React- The Complete Guide (incl. Next.js, Redux)
